L'elegante forma emisferica consente ad Emisphere di amplificare l'uscita del suono dagli speaker dei smartphone. Realizzato artigianalmente in Italia in ceramica smaltata, oltre ad amplificare la musica con le sole proprietà acustiche del materiale e della forma, decora in modo originale lo spazio.

The elegant semi-spherical shape allows the Emisphere to amplify the sound output from the speakers of the smartphone. Handcrafted in Italy of glazed ceramic, in addition to amplify the music with just the acoustic properties of the material and form, in an original way decorate the space.
